

openFrameworks Workshop

2D Engine-Box2D

By: Peng Cheng

Why do you want to
use Box2D?

Collision Events

SCORE

What makes up Box2d
world?

Box2d world

1. World

2. Shape

3. Body

4. fixture

5. joint

World

- Gravity
- createGround
- createBounds
- registerGrabbing
- find fixtures in a given region

The world is like this ship

Body

You can think of a body as the properties of an object that you cannot see (draw) or touch (collide with).

- mass
- velocity
- location
- angle
- rotational inertia

Fixture

Fixtures are used to describe the size, shape, and material properties of an object in the physics scene.

- size,
- restitution,
- friction,
- density

Body & Fixture

Today's goals

1. Initialize Box2d world
2. Generate different Box2D circles, rectangle, triangles and etc.
3. Use Box2d edge to make land
4. Understand Box2d Native code(optional)
5. Create a simple game
